

Education Devcamps – Fast facts 11

Cognitive Services, BOT Framework and Machine Learning

17 September 2018

Topic: AI in the Microsoft cloud

How AI changes the way we work

How AI changes the way our solutions look like

AI in the Microsoft world – at the fingertips of the developer and partner

- Cognitive Services

- BOT Framework

- Machine learning

Why should you care?

What is AI for YOU?

How does AI change your everyday work?

How can AI change your solutions and products

Ways to improve your solutions with:

- BOTs
- Cognitive Services
- Machine Learning

New solution offerings with AI from Microsoft inside your solution(s)

Content of the chapter

Why AI can make you more successful

Where AI changes the way your application can work

Cognitive Services – an overview

BOT Framework – an overview

Special topic: BOTs in Microsoft Teams

Azure Machine Learning – let machines help to make your solution smarter

Take away

Why AI is important in your solution

What purposes the Microsoft AI technologies can serve in your solutions

How to add AI technologies and tooling to your solution framework

HOL

Create a BOT

Use Cognitive Services inside of this BOT

Adapt ML based on your data for predictions

Thank you.
