Microsoft

Education Devcamps – Fast facts 10
The right tool for the job

17 September 2018

Topic: Tools

Why the right tools can make you succeed better
The tooling in the Microsoft world
  Microsoft Visual Studio
  Microsoft Cloud and Microsoft Azure
  Data storage in Microsoft Azure
  PowerApps for your solution

Why should you care?

Are you using the right tool for your task?

- Why are you creating UIs always manually (PowerApps)
- Are you hosting all data on premise (cloud data storage)

How to address development tasks with:

- Visual studio and Visual Studio Code (development)
- Azure SQL, CosmosDB and various others (data storage)
- Azure DevOps project (effective testing and deployment)
- Automated installation/configuration with ARM (automated deployment)

`

Content of the chapter

PowerApps
Visual Studio
Data storage Technologies
Microsoft Azure DevOps project
Microsoft ARM

Take away

Learn and understand the tools in the Microsoft world
Learn that sometimes a simple and easy UI can be created with no-code
Know which tool serves which purpose
How to get the tools you need from where

HOL

PowerApps

Microsoft

Thank you.
